TIPS for CORSETRY ZIPS

If your Demask Corset or Basque has a Zipper. Always close it using the Lacing & NOT with the Zip. As the Zipper can not take the strain that is being put on it when the Corset or Basque is already tightened to the reduced waist size. No matter how strong the Zipper is, it will break eventually. Once broken the Zipper can not be replaced, it is technically impossible to fit a new Zip into an existing Corset or Basque. So always do the Zip up first & then tighten to the reduced waist size using the Lacing. Following these instructions will give you years of restrictive corsetry pleasure.

TIPS for CORSETRY ZIPS

If your Demask Corset or Basque has a Zipper. Always close it using the Lacing & NOT with the Zip. As the Zipper can not take the strain that is being put on it when the Corset or Basque is already tightened to the reduced waist size. No matter how strong the Zipper is, it will break eventually. So always do the Zip up first & then tighten to the reduced waist size using the Lacing. Following these instructions will give you years of restrictive corsetry pleasure.

RUBBER CARE

TIPS

Never expose to sunlight or heat, this may damage or fade the rubber. Black will tend to turn white. Store rubber in a dark, dry, cool place such as a closet, preferably in a black plastic bag.

Hand wash the garment in luke warm water. A mild soap may be used if required. Hang dry both surfaces, (towel dry any metal fittings). Lightly talc the inside before storing.

Liberalily talc the inside before putting on a rubber garment especially tight fitting clothes such as catsuits, stockings, gloves, etc. This will enable you to slip into them with ease. When dressing, avoid using excessive force, rubber tears easily. Pulling too hard with your fingertips will leave permanent dimples. Also jewelry & sharp nails may puncture the fabric. While wearing rubber, avoid coming into contact with abrasive surfaces. This will damage the surface of the material making it lackluster & dull.

To make rubber shiny, a good sheen can be attained using a silicone polish. We recommend PERV-O-SHINE, it is water-based & washable. Apply sparingly using a lint free cloth. A silicone spray such as PERV-O-SPRAY can be used after polishing to achieve a super high-gloss finish. Please note that silicone sprays do not dry completely unlike the wipe-on products, it will remain sticky to the touch. Both products are available from DeMask.

Should the garment tear or become damaged in any way, do not attempt to wear or repair it. Have it professionally repaired. Following these guidelines will help your rubber stay in tip-top condition giving you many years of pleasure. Complaints will only be entertained if you have adhered strictly to the above instructions.

REPAIRS

Repairs will only be accepted if all the following conditions are adhered to;

- 1. Garments must be thoroughly cleaned inside & out, including all traces of rubber polish or silicone products.*
- 2. The original receipt must be supplied as garments should be no more than one year old.*
- 3. Repair has not already been attempted.*

DISCLAIMER

Due to the nature of our products DEMASK companies will accept no responsibility for;

- 1. Personal injury through misadventure or incorrect usage.*
- 2. Allergic reactions due to the natural latex content in all of our rubber products.*
